

“Speed, Quality, Economy...”

General Information

OUR MISSION: Superior products delivered with superior service.

OUR OBJECTIVES: **ACCEL Color** will deliver custom-manufactured products with the speed of a distributor and manufacture efficiently to a unit of one.

ACCEL Color is dedicated to meeting all of your color and additive needs. **ACCEL Color** offers a full line of custom and proprietary products and services including:

- ▶ Color concentrates
- ▶ Dry color blends
- ▶ Toll and custom compounding
- ▶ Additive concentrates

ACCEL Color facilities are located in close proximity to our customers in order to speed our responses in both deliveries and technical support. Each facility services a 150-250 mile radius. Each facility is equipped with a self-contained product development and quality control laboratory, featuring state-of-the-art formulation and Q/C computer systems in addition to other testing equipment. The company inventories hundreds of pigments and additives so the ideal value can be created for each application.

ACCEL Color plants are designed for maximum efficiency and manufacturing flexibility. Each facility utilizes a variety of mixing equipment, including pulverizers, blenders and high-intensity mixers. An array of extrusion equipment, from specialized laboratory extruders to high-volume production lines, features both single-screw and twin-screw technologies. Our manufacturing capabilities enable **ACCEL Color** to color almost any resin system for almost any end application, quickly and economically.

Tying together **ACCEL Color**'s business process is a proprietary software application designed by the company to provide maximum transaction efficiency. Every aspect of a transaction – from product development through pricing, documentation, order entry, manufacturing and delivery – is processed quickly and with minimal opportunity for error. The system supports **ACCEL Color**'s quality system, with tools that monitor vendor performance and allow for traceability of every order.
